Air Asia Web Application Requirements Document

Web App Class Homework
Updated 2/13/2019

Objective

You are hired as an intern with Air Asia, the most successful budget airline in Asia. You are recently hired by Air Asia to extend the existing mileage rewards program with the mileage rewards redemption component. This system allows Air Asia customers to redeem gift cards using their reward points. An example of such a program is here (https://amzn.to/2F9T7rW). This website has two types of users (or roles): customer and admin. Roles are only applicable for HW4.

Use cases

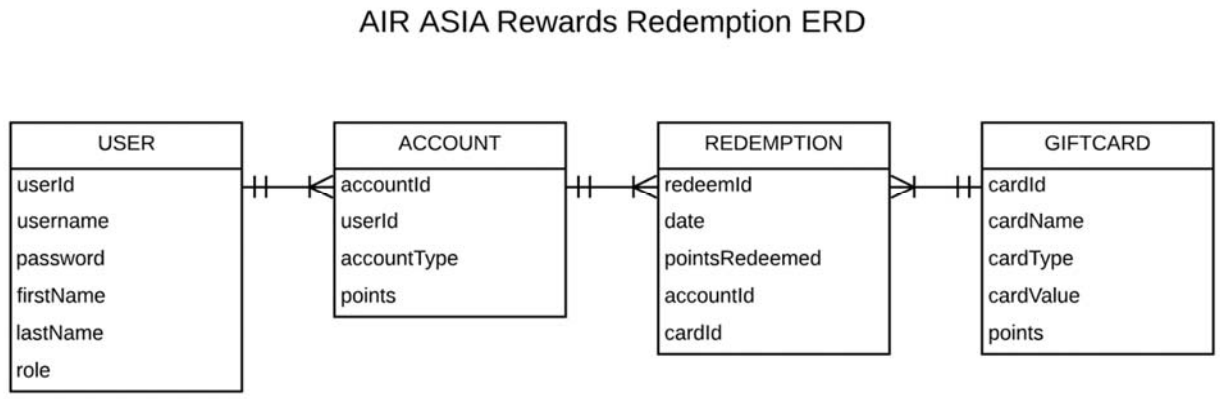

This website should have the following use cases:

	Use case	Page Name	Role(s)	Description
1	Login	login	Customer Admin	1. User login to the app. 2. Upon login, user is forwarded to card-list page.
2	View a list of gift cards	card-list	Customer Admin	1. User views list of gift cards (show gift card image, card name, and points). 2. Each card has a link to card-details page. The link can be on the image or card name. 3. Display a link on top of the page to card-add page. 4. Display a link on top of the page to cust-add page.
3	View details of one gift card	card-details	Customer Admin	1. User view details of one card. Show card image. 2. Display a link to card-update page. 3. Display a link to card-delete page.
4	Add data for a new gift card	card-add	Admin	1. User adds card for a new card. 2. Upon submission, user is forwarded to card-list page.
5	Update data for one gift card	card-update	Admin	1. User updates data for one card. 2. Upon submission, user is forwarded to card-list page.
6	Delete a card	card-delete	Admin	1. User deletes one card. 2. This is a PHP page no HTML display is needed.
7	Add a customer	cust-add	Admin	1. User adds a new customer. 2. Upon submission, show the user information.
8	Redeem gift cards		Customer Admin	1. User selects a gift card to redeem. 2. System checks if user has enough points.

				3. If yes, show success page. Deduct points for the gift card from user account. Insert a new redemption row in DB. 4. If no, show unsuccessful page.

Database Information

Entity Relationship Diagram (ERD)

User table data structure

Attribute	Data Type	Size	Auto	NULL	Constraint
userId	int	11	YES	NO	Primary
userName	varchar	100		NO	
password	varchar	100		NO	
firstName	varchar	100		NO	
lastName	varchar	100		NO	
role	varchar	100		NO	

Account table data structure

Attribute	Data Type	Size	Auto	NULL	Constraint
accountId	int	11	YES	NO	Primary
userId	int	11		NO	
accountType	varchar	100		NO	
points	int	50		NO	

Redemption table data structure

Attribute	Data Type	Size	Auto	NULL	Constraint
redeemId	int	11	YES	NO	Primary
date	varchar	100		NO	

accountId	int	11		NO	
cardId	int	11		NO	
pointsRedeemed	int	50		NO	

Gift card table data structure

Attribute	Data Type	Size	Auto	NULL	Constraint
cardId	int	11	YES	NO	Primary
cardName	varchar	100		NO	
cardType	varchar	100		NO	
cardValue	float	10		NO	
points	int	50		NO
